"The Pedigree  
is in the Name"

## Embryos Available

Only the most elite females, each one having produced at least 6 consecutive calves, starting as a two-year-old, with proven track records, have made it into our Embryo Program.

### Lasater Beefmaster 3062

A 1993 model, Lasater 3062 is highly fertile and functional, the ideal cow in a multi-trait selection program. Before deciding to flush Lasater 3062, she was raising her 11th consecutive calf. She is the dam of Herd Sire, Lasater 1392. **Embryos Available: 2 by Lasater 3705.**

### Lasater Beefmaster 5917

A 1995 model, Lasater 5917 is a highly functional and athletic cow with an udder of a two-year-old. She is virtually flawless in her structure. Every year she has weaned heavy, attractive calves. **Embryos available: 4 by Lasater 5096.**

### Lasater Beefmaster 8593

Lasater 8593 is clearly one of our most productive cows. Three of her calves had weaning weights over 700 lbs., including two heifer calves. That's outstanding on the shortgrass prairie of Eastern Colorado or anywhere else. She is built like a tank and yet extremely feminine. **Embryos available: 3 by Lasater 3705.**

### Lasater Beefmaster 7516

An attractive cow with tremendous length, Lasater 7516 has been a heavy hitter in more ways than one. When you combine her production record and her flush record, you've got something very unique and worth while. **Embryos Available: 24 by Lasater 3705 and 12 by Lasater 4248.**

## Lasater Beefmaster 8613

Here's another outstanding female with a flawless record and wonderful body-type. She is filled to the brim with high production qualities like fertility, milk production, and growth. Her fourth calf, Lasater 3610, was chosen as a Herd Sire. **Embryos available: 2 by Lasater 3705 and 1 by 5096.**

## Lasater Beefmaster 9501

Here's one of the most beautiful cows you will ever see, with a perfect udder at the age of 8. Another great cow with an outstanding production record. Like the others, she has never missed a beat. **Embryos Available: 6 by Lasater 0192.**

## Lasater Beefmaster 8526

Lasater 8526, also a 1998 model, is another outstanding fertile and productive females. She is the dam of Herd Sire 5227. **Embryos available: 8 by Lasater 0192.**
